

Aspects to be improved

Organisation: visits to Ferrara and Bologna had to be arranged by a private bus

Difficulties with hosted students: difficulty understanding the health and non-health problems of the foreign student, not communicated in advance (or even after)

Suggestions

Visits (2)

A meeting in presence, with the hosting families, could have allowed the families to know each other, to help one another in case. A transport to pick everybody up to/from the airport would have been more appropriate.

Visits to the main cities too short; visit to Cento too long.

Organize private transports to/from the airport and to/from the cities visited during the staying.

Check the linguistic level of the guest to be more appropriate and fit for the hosting student.

The project should be longer and take more time, to let the students do more activities also in their free time.

Comments

It was a great experience which led to a visible improvement of the English language and the cultural exchange has happened actually: a very good organisation! We were all deeply satisfied. Compliments!
